SUMMARY

A results-driven Frontend Software Engineer with 4 years of experience specializing in modern JavaScript frameworks (React, Angular), TypeScript, and UI development. Proven track record of delivering scalable, user-centric solutions and driving team success. Passionate about building innovative software and achieving impactful results.

WORK EXPERIENCE

iHeartMedia   Mar 2021 - Present

Associate Software Engineer | Aug 2021 - Present
Technologies/Tools: JavaScript, TypeScript • Java • Angular • jQuery • Node.js • Express.js • AWS/CDK • Jest, Jasmine • Cypress • Jenkins

- Increased code testing coverage by 40% using Jest, Test Driven Development, and Behavior Driven Development, leading to improved code quality and eliminating bugs
- Established unique user roles and permissions for enhanced security and specific station access control
- Designed and deployed a robust API fallback mechanism with Node.js, TypeScript, Jest, and AWS, boosting team productivity by 50%
- Gained expertise in Angular in four to five months, enhancing team workflow by:
  - Updated the Billing Instructions microservice component from a drop down to a sliding modal, optimizing screen space and improving the user experience
  - Resolved critical production issues and bugs, ensuring seamless functionality of the UI
  - Performed thorough testing with Cypress, Jasmine, and Karma, ensuring application resilience and reliability
- Implemented a microservice architecture repository with Angular and Jenkins, facilitating enhanced visibility into ongoing proposals and orders; fostering improved collaboration and efficiency

Software Engineer Intern | Mar 2021 - Aug 2021
Technologies/Tools: React • Material-UI • AWS • Jira • Lucid

- Developed a React-based single-page application integrated with AWS (Lambda, API Gateway, S3) and Material-UI, streamlining Release Notes tracking for Business Analysts and Project Managers
- Collaborated with stakeholders to evaluate client requirements and created detailed Lucid wireframes, enhancing alignment and increasing client satisfaction scores
- Implemented Agile methodologies, reducing critical bugs by 20% and improving sprint on-time completion rate from 70% to 90%
- Received recognition for outstanding performance, leading to a full-time offer

SKILLS

HTML, CSS, JavaScript, TypeScript, React, Angular, jQuery, Node.js, Express.js, AWS, Cypress

EDUCATION

Rutgers Coding Bootcamp - Certificate of Completion, Full-Stack Web Development   Sept 2019 - Mar 2020
Syracuse University - Bachelors of Science, Human Development & Family Science   May 2019
